

Summer, 2013

REVOLUTION BAG can be a service to you in helping achieve your sustainability goals for your facility. One area we believe we can assist you in, is EPA approved and LEED approved plastic Trash Can Liners. Check out www.revolutionbag.com

We represent “**Revolution Bag**” which has been USGBC LEED certified, EPA certified by SCS Global Services. We are pending EPP certification (environmentally preferred products).

Environmental Benefits

- SCS Global Services conducted an assessment of Revolution Bags to determine the positive impact our product has on the environment
- The Life Cycle Assessment (LCA) proves that production of 100,000 can liners made with 70% post consumer recycle content results in lower environmental impacts.

Impacts studied

- **Energy resource depletion** – results in 53% less depletion of energy resources
- **Global Climate Change**- Results in 37% lower CO₂-eq green house emissions, equal to the removal of one car per year off the road.
- **Ocean Warming** – reduces ocean acidification 12% , ocean warming 31% lower and regional 51% lower.
- **Ground Level Ozone** (smog)- decreases human exposure by 31% and fine particulate matter by 50%

I look forward to meeting and discussing your sustainability initiatives and how Revolution Bag can be a part of those solutions.

Sincerely

Scott Whittington
